

Harvard University,
Cambridge, Massachusetts
United States of America,
22 March, 1901.

Geheimer Regierungsrat Herman Grimm:

The Department of Germanic Languages and Literatures in Harvard University desires to express its deep appreciation of the interest that Professor Grimm has taken in the prosecution of Germanic studies in America and particularly in the Germanic Museum about to be established by this University. Professor Grimm is known and honored on both sides of the Atlantic as a representative of the ripest culture and as a lover of all that makes for the highest civilization, whether in the Rome of Michel Angelo or in the

Concord of Emerson. The noble volume which the Department has received from Professor Grimm is a token of that community of ideals which links the Old World to the New, and its value is enhanced by the kindness which prompted him to make the gift.

The Department hereby conveys to Professor Grimm its grateful acknowledgments.
