

List of the Nobel Prizewinners.

1. The Nobel prize for **physics**:

The prize for the year 1901 was awarded to:

RÖNTGEN, WILHELM CONRAD, professor of physics at the University of Munich, born 1845, died 10th February, 1923: *In recognition of "the exceptional services rendered by him in the discovery of the special rays which have been called after him."*

The prize for the year 1902 was divided equally between:

LORENTZ, HENDRIK ANTOON, professor of physics at the University of Leyden, born 1853, died 5th February, 1928; and

ZEEMAN, PIETER, professor of physics at the University of Amsterdam, born 1865. *In recognition of "the special services rendered by them in their investigations regarding the influence of magnetism upon the phenomena of radiation."*

The prize for the year 1903 was awarded with one half to:

BECQUEREL, HENRI ANTOINE, professor of physics at the École Polytechnique in Paris, born 1852, died 25th August, 1908. *In recognition of "the special services rendered by him in the discovery of spontaneous radioactivity."*

The other half was divided equally between:

CURIE, PIERRE, professor of physics at the École municipale de physique et de chimie industrielles in Paris, born 1859, died 19th April, 1906; and his wife:
